APPENDIX & METHODOLOGY

Data Sources

This report is based on publicly available UK Land Registry transaction data, processed and analysed by Datagods Analytics.

Additional geographic categorisation was applied using postcode district and postcode sector mapping methodologies.

Methodology

Average prices represent mean residential transaction values over the selected reporting period.

Sales volumes represent completed residential transactions recorded within the chosen geography.

Property classifications:

- D = Detached
- T = Terraced
- S = Semi-Detached
- F = Flat / Maisonette

Tenure classifications:

- F = Freehold
- L = Leasehold

Important Notes

Some postcode sectors may contain limited transaction counts, which can increase pricing volatility.

Historic transaction trends should be interpreted as directional indicators rather than property valuations.

All figures are rounded where appropriate.
